

Default Property Values

By default, Transfer sets values to *properties* that are found on TransferObjects.

These default values are:

- string: ""
- numeric: 0
- boolean: false
- date: Now()
- UUID: a random UUID
- GUID: a random GUID
- binary: an empty byte array

To see more on how to set your own defaults, see the 'configure' method in the [Custom Methods](#) or [Writing Decorators](#) sections of the documentation.
